Data Engineer

Data Engineer with 7+ years of experience in building data-intensive applications, tackling challenging architectural and scalability problems, and delivering solutions in healthcare, e-commerce, and retail. Currently helping Tesco streamline driver onboarding workflows and previously enabling Tiger Analytics and Fragma Data Systems with advanced analytics and big data engineering.

WORK EXPERIENCE

Tesco • Bengaluru, Karnataka, India 01/2024 - Present

Data Engineer • Full-time

- Developed a scalable ingestion framework and event-driven pipelines using Scala and Spark to efficiently load datasets into Hive tables
- Collaborated with the product team to streamline driver onboarding and manage amendments to existing driver records, ensuring data accuracy and compliance**.**
- Implemented backup and recovery logic leveraging Delta tables, enabling robust protection against data loss and faster restoration during failures.
- Provided production support on a rotational basis (ROTA), proactively diagnosing and resolving critical issues to maintain system reliability.
- Automated driver onboarding workflows and dimension table updates using GHA pipeline and Apache Spark, reducing manual effort and improving operational efficiency

Tiger Analytics • Bengaluru, Karnataka, India 02/2021 - 12/2023

Data Engineer • Full-time

- Spearheaded the successful migration of critical data processing workflows from Scala to PySpark, optimizing performance and reducing code complexity by ~40%.
- Helped Lego team to parallelize model training and deployment of trained models using SparkR and Databricks resulting in performance improvement by ~60% and compute cost reduction by ~45%.
- Pioneered development of multiple applications for ReactiveCore team to load, categorize, vectorize and match health care individual and organization data using PySpark, SQL Server, AWS S3, HDFS and Airflow.

Fragma Data Systems • Bengaluru Area, India 07/2018 - 02/2021

Software Engineer • Full-time

- Developed a near real-time tracker of construction machines for L&T which helped them in alerting and fixing machinery failure increasing productivity by ~65% using Azure IoT Hub, PySpark, Python and SQL Server.
- Worked with Mashreq team to build a framework that helped in ingestion of transactional data across diverse primary data sources using PySpark, Python, Hive and Airflow.

SKILLS

- **Programming:** Python, Scala, SQL
- **Data:** Athena, Data Analysis, Data Migration, Data Modelling, ETL Pipelines, Glue, Hive, MSSQL, Redshift, Spark
- **Cloud:** AWS, Azure
- **Tools:** Airflow, Bitbucket, GitLab, Jira, Oozie

EDUCATION

Bachelor of Engineering - BE in Computer Science

Technocrat Institute of Technology, 24, Anand Nagar, Bhopal

01/2013 - 12/2017
